Why choose Electrocompaniet?

- The high musical fidelity of all Electrocompaniet products.
- Stylish design in both Classic and Prelude line products.
- The outstanding quality of assembly (handcrafted in Norway)
- The big range of products helping to build the exact system you want.
- Latest technological innovations to keep up with the times.
- Global recognition of professionals and audiophiles around the world, as a proof of successful job.

ELECTROCOMPANIET

If music really matters™

Our Vision

Since Electrocompaniet's foundation, main goal is to reproduce music as it was recorded.

With outstanding performance, excellent resolution, superb control and precise musical rendering, we have succeeded in making products that are true to our two slogans.

“If Music really matters” and “Closing the gap to the master”, which are the source of inspiration for our engineers and company employees.

Our vision and goal is to unify art and advanced technology. Yes we have high ambitions. We will continue to work for our ultimate goal – extremely exact reproduction, high quality, timeless design, and an intuitive and flexible user interface.

Electronic engineers

Geir Svihus

analogue specialist

Geir is a keen electronics enthusiast, extremely interested in Hi-Fi and electronic ever since he was a little boy. Even before going to the university, he designed both amplifiers and loudspeakers. He graduated from the best university in Norway, as a specialist in the field of analogue electronics. He works closely together with Terje Sandstrøm in the development of new designs, building on and refining the basic, successful principles used by Electrocompaniet in the past.

Terje Sandstrøm

mentor and design controller

Terje Sandstrøm is one of the main designers of the current Electrocompaniet range. He is involved with all new Electrocompaniet designs and upgrades. Terje was one of the key people in the development of the classic Electrocompaniet 25W amplifier and also the ampli-wire designs. He is our mentor, and all new designs have to be analysed and accepted by him before release.
